closed (15 May 2024)

Message from the Guest Editor

Dear Colleagues,

This special issue explores recent advancements in osteoarthritis and cartilage regeneration. It focuses on understanding the pathophysiology and molecular mechanisms, new therapeutic strategies, cutting-edge technologies, and emerging trends in the treatment of osteoarthritis. The issue covers research on disease progression, early diagnosis approaches, and regenerative therapies for cartilage repair. By fostering collaboration among experts, this issue aims to provide valuable insights and drive breakthroughs in cartilage regeneration. Researchers and scientists are encouraged to share their work to advance our knowledge and clinical applications in the field.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
