Deadline for manuscript  
submissions:

**closed (31 January 2024)**

### **Message from the Guest Editor**

Abiotic stresses can have negative impacts on crop yield worldwide due to the inhibition of plant growth and development. These stresses, such as low or high temperature, high salinity, heavy metals, and high CO<sub>2</sub> concentration, are already threatening to ensure sustainable agriculture in ecosystems. Reactive oxygen species (ROS) can be induced by oxidative damage to DNA, RNA, molecules, and lipid peroxidation, and can lead to cell destruction in plants. Furthermore, plant hormones, such as abscisic acid, auxin, brassinosteroid, gibberellin, cytokinin, ethylene, salicylic acid, jasmonate, and strigolactones, are known to play crucial roles in the stress responses of plant.

Various molecular and computational approaches are used to find genomic clues associated with stress tolerance in the regulation of ROS and hormones. This Special Issue of the *International Journal of Molecular Sciences* journal, titled “Abiotic Stress Tolerance in Plants: The Regulation of Reactive Oxygen Species and Plant Hormones”, aims to summarize these views.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. José L. Quiles

Department of Physiology,  
Institute of Nutrition and Food  
Technology “Jose Mataix”,  
Biomedical Research Center,  
University of Granada, Avda.  
Conocimiento s/n, 18100 Armilla,  
Granada, Spain

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
