### Message from the Guest Editor

Dear Colleagues,

Orchidaceae is one of the largest families among the angiosperms and is represented by approximately 25,000–28,000 species worldwide across a wide range of habitats. Orchids are well known for their attractive flowers and have highly economical value in the global horticultural market. What often receives less attention is the fact that some orchids are edible or scented, and more than this, many species have long been used in preparations as traditional medicine. In the past two decades, extensive studies have been carried out on genetic and functional genomic analysis to achieve progress on biotechnology and breeding programs in orchids. However, in-depth research on bioactive compounds of orchids is still limited to several species.

In order to address the lack of phytochemical knowledge, this Special Issue aims to integrate recent innovative approaches and attempt to make significant progress in orchid biochemistry by expanding knowledge on a wide range of topics, including biosynthetic machinery, pharmacognosy, biotechnology, and high-throughput technologies, including bioinformatics and other related topics.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maurizio Battino

Department of  
Odontostomatologic and  
Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of  
Medicine, Università Politecnica  
delle Marche, Via Ranieri 65,

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
