Deadline for manuscript submissions:

closed (31 December 2020)

Message from the Guest Editor

The last 30 years of cancer research has greatly improved our understanding of the interplay between the cancer cell and its microenvironment, and have led to the design of therapies targeting key intrinsic and extrinsic drivers of tumor progression in cells. Some of these therapies have been approved and are currently improving the life of cancer patients. Such is the case for drugs targeting the epidermal growth factor receptor family, or those targeting the PD-1/PD-L1 immune checkpoint. In this Special Issue, we aim to present an overview of the ongoing research into promising and approved molecular targeting strategies for the treatment of solid tumors. These include strategies initially designed to target specific molecules or malignancy-associated events, but also those involving the repurposing of conventional anticancer agents or drugs intended to treat other diseases. We welcome contributions that advance our fundamental knowledge on these strategies, with particular emphasis on their feasible clinical use and capacity to improve cancer treatment outcomes.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
