### Message from the Guest Editor

We are currently inviting high-quality papers from outstanding scholars and research groups for this Special Issue, “New Insights in Kawasaki Disease”, of the International Journal of Molecular Sciences. Kawasaki disease is the most common form of systemic vasculitis in pediatric patients and potentially renders miserable cardiovascular sequelae in those affected children who are not promptly diagnosed or treated. In this Special Issue, we are seeking high-quality research articles, communications, and review articles at the cutting edge of molecular biology. New concepts and approaches such as multiomics, artificial intelligence, and precision medicine pertaining to the diagnosis, pathogenesis, and treatment of Kawasaki disease are particularly welcome.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
