Deadline for manuscript  
submissions:

**closed (28 February 2021)**

### Message from the Guest Editor

Dear Colleagues,

Exploration of the transcriptome space has turned the spotlight on the dark side of the RNA planet, non-coding RNAs (ncRNAs), previously overlooked by conventional protein-coding studies. It has become increasingly clear that ncRNAs constitute the largest class of RNA transcripts, resulting from pervasive transcription of the genome. We are now in an exciting era, which is unveiling the previously unappreciated regulatory power of all these RNA species and their functional interactions.

Untangling such RNA-based networks is now outlining their relevant role in a wide range of biological pathways. ceRNET research is still in its infancy, but could fulfill the promise to gain a deeper insight into molecular mechanisms underlying human diseases.

This special issue welcomes original research manuscripts, unraveling novel RNA regulatory networks and their impact on human diseases, possible rules for ncRNA structure-function relationships, or reporting innovative methodological approaches; critical review manuscripts with a perspective vision setting the stage for future research are also especially welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
