

Radiation and Photochemical Modifications in Proteins: Mechanistic Aspects and Applications

Guest Editors:

Prof. Dr. Krzysztof Bobrowski

Centre of Radiation Research and Technology, Institute of Nuclear Chemistry and Technology, Warsaw, Poland

Prof. Dr. Bronisław Marciniak

1. Faculty of Chemistry, Adam Mickiewicz University, Poznań, Poland
2. Center for Advanced Technology, Adam Mickiewicz University, Poznań, Poland

Deadline for manuscript submissions:

closed (30 June 2022)

Message from the Guest Editors

Proteins are highly abundant cellular biomolecules and therefore are a major target when biological systems are irradiated or illuminated. Radiation- and photo-induced modifications in proteins are associated with changes in their structure and functions. Radiolysis (the initiation of reactions by high-energy radiation) and photolysis (the initiations of reactions by UV and visible light) were found as very valuable and powerful chemical tools for inducing and studying radical processes that are of particular interest in biology and life sciences. The use of the methods of radiolysis and photolysis has provided a wealth of data, especially about the kinetics of the oxidation by various free radicals and their mechanisms, the identification of transients formed, their lifetimes and the possibility to repair them by the so-called antioxidants.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
