Deadline for manuscript submissions:

**closed (14 December 2018)**

### Message from the Guest Editors

Ion channels are membrane proteins that play crucial roles in all forms of life and are highly conserved from bacteria to humans. Ion channel activity is an important pillar to cellular homeostasis and maintenance of health. Because of their contribution to the pathophysiology of several human maladies, these proteins are targets of many drugs, from antiepileptic to analgesics. In addition, they are also the off-targets of a plethora of molecules. Thus, ion channel dysfunction is at the onset of several human diseases known as channelopathies, as well as the unwanted drug side effects. The establishment of an integrative and pluridisciplinary ion channel research program brings together the complementary skills needed for advancing our current knowledge on the ion channel field, from pathophysiology to drug discovery.

To accomplish this ambitious goal, the Spanish Ion Channel Initiative (SICI), an interinstitutional consortium, was established in Spain. SICI is a Network of Excellence on translational research that embraces all aspects of ion channels from genes to organisms, and from basic research to the clinic.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
