Message from the Guest Editor

Nucleotides and inositol phosphates are examples of second messengers involved in cellular events, and some analogs of this type are promising enough to be tested as drugs. Other analogs have become standard tools for the investigation of biochemical and physiological signal transduction pathways, like the *Rp*-diastereomers of adenosine and guanosine 3',5'-cyclic monophosphorothioate, as competitive inhibitors of cAMP- and cGMP-dependent protein kinases. Next generation analogs exhibit a higher membrane permeability, increased resistance against degradation, and improved target specificity, or are caged or photoactivatable for fast and/or targeted cellular imaging. Novel specific nucleotide analogs activating or inhibiting cyclic nucleotide-dependent ion channels, EPAC/GEF proteins, and bacterial target molecules have been developed, opening new avenues for basic and applied research. This Special Issue will highlight recent developments in second messenger analog research, as well as comment and elaborate on seminal findings in the field in the form of technical or review papers.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
