Message from the Guest Editors

Dear Colleagues,

Selenium (Se) is a trace element with a pivotal role in redox homeostasis and functions in human health that are not fully characterized. Additionally, inorganic selenocompounds along with small organic molecules containing Se have demonstrated multiple activities in CNS-related illnesses and many other diseases through a plethora of mechanisms. This Special Issue will cover different steps of the development process (from the design and evaluation to the molecular characterization of the mechanism of action) of novel inorganic and organic selenoderivatives as bioactive compounds for human diseases. We firmly believe that the latest research into selenoderivatives and their biological effects should shed some light for gaining further knowledge about the interconnection of this class of compounds and illnesses such as cancer, parasitic diseases, Alzheimer's disease and Parkinson's disease, among others. Thus, the development of novel selenoderivatives could represent a novel and promising approach to developing more potent and safer bioactive agents.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
