Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to attract the interest of the scientific community studying the impact of Si on the response of plants to (a)biotic stresses and the use of Si-based nanodelivery systems tailored for agronomical uses. Contributions in the form of original research papers, as well as topical reviews and/or short communications focusing on the use of -omic technologies (RNA-Seq, metabolomics, proteomics, metagenomics/metatranscriptomics), microscopy (e.g., high-resolution, confocal), and nanotechnology for the manufacture and characterization of Si-containing nanoparticles are welcome.
