Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editor

Organoids, three-dimensional (3D) multicellular structures formed by the self-aggregation and differentiation of pluripotent stem cells, present unique opportunities to study and understand complex biology within a physiologically relevant and tractable context. Their 3D nature better represents the *in vivo* environment than more traditional 2D cell models, and by manipulating growth conditions and signalling factors, organoids can be generated to typify an ever-increasing variety of human organs.

This Special Issue will focus on recent advances in the generation of organoids derived from human pluripotent stem cells and the application of these organoids to the investigation of developmental biology and disease modelling. Original articles and reviews are invited from basic research studies on all aspects of human PSC-derived organoid development, and the application of organoid technology to the development of novel model systems and the interrogation of complex disease phenotypes.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
