### Message from the Guest Editor

Steroids have pleiotropic effects on the nervous system (NS) throughout the lifespan. The NS is both a target and a site of synthesis and metabolism of steroids. Steroid concentrations in the NS depend both on systemic intake and local synthesis. It is now well established that the NS is able to synthesize progesterone, testosterone, and estradiol from cholesterol. This Special Issue “Steroids and the Nervous System” will compile reviews that address various aspects of the relationships between steroids and the NS, including synthesis, metabolism, regulation, and effects. Special emphasis will be on neurosteroids, neuroactive steroids, and the effects of steroids on brain development and sexual differentiation, neuroprotection, neuroinflammation, myelination, synaptic modulation, memory, and behavior. Reviews on the therapeutic potential of steroids for NS injuries and disorders are also welcome.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. José L. Quiles

Department of Physiology,  
Institute of Nutrition and Food  
Technology “Jose Mataix”,  
Biomedical Research Center,  
University of Granada, Avda.

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
