

Recent Advances in Biomolecule and Bioprocess Engineering for Sustainable Environment

Guest Editors:

Dr. Hah Young Yoo

Department of Biotechnology,
Sangmyung University, Seoul
03016, Republic of Korea

Dr. Ja Hyun Lee

Department of Food Science and
Engineering, Dongyang Mirae
University, 445, Gyeongin-ro,
Guro-gu, Seoul 08221, Republic
of Korea

Prof. Dr. Chulhwan Park

Department of Chemical
Engineering, Kwangwoon
University, 20, Kwangwoon-ro,
Nowon-gu, Seoul 01897,
Republic of Korea

Deadline for manuscript
submissions:

20 November 2024

Message from the Guest Editors

Climate change caused by anthropogenic greenhouse gas emissions is a global challenge that needs to be urgently addressed. White biotechnology as an alternative to the petrochemical industry, which is known to be a major source of greenhouse gas emissions, has recently received significant research attention. We are hopeful that rapid advances in the core technologies and bioprocesses of biorefinery and their application to industry will ensure a sustainable environment and future. The biotechnology associated with biorefineries has evolved considerably to meet the challenges of efficiently utilizing a diverse biomass. The main challenges lie in securing the economic feasibility of the bioprocess, and more specifically, in the (1) exploration, characterization, and development of strategies to utilize sustainable biomass; (2) strain development to enhance the production of bioproducts; and (3) the provision of molecular-level analyses to improve efficiency. Advanced biotechnology and tools such as metabolic engineering, protein engineering, enzyme engineering, bioprocess engineering, molecular analysis, and statistical optimization are expected to address these challenges.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
