Deadline for manuscript
submissions:

closed (29 May 2025)

Message from the Guest Editor

Serotonin is found in almost all representatives of the animal kingdom, appears in development as early as the single-cell stage, and accompanies the life of the organism until its last days. Normally, serotonin exerts its physiological effects through the activation of more than 14 different receptors on the cell membrane. In addition, it has recently been found that 5-HT as an intracellular agent causes posttranslational protein modification—serotonylation—and is thus involved in important physiological and pathophysiological processes, including permissive gene expression.

In this Special Issue, we would like to encourage all researchers whose work is related to serotonin to present their latest findings, in-depth expertise, and methodological benefits to the wide audience of IJMS. The issue will cover a broad area of serotonin as a biological substance, from distribution to functions, in the course of development, growth, and aging. Any subtleties of serotonin action in health and disease that you have uncovered using model systems in vertebrates and invertebrates are welcome!

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology,
Institute of Nutrition and Food
Technology “Jose Mataix”,
Biomedical Research Center,

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
