Deadline for manuscript submissions:

closed (30 January 2024)

Message from the Guest Editors

Dear Colleagues,

Most in vitro studies detect exposure effects using short acute exposures and high (and unrealistic) concentrations. However, there is an alternative approach that represents a more realistic scenario and uses subtoxic concentrations and long-term (weeks) exposures. This Special Issue aims to highlight papers that, under the umbrella of "long-term exposures", explore the in vitro effects of environmental pollutants in terms of general toxicity or, more specifically, mechanistic aspects such as their carcinogenic and epigenetic effects.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
