Cancerology of Montpellier,
University of Montpellier, 34298
Montpellier, France

Deadline for manuscript
submissions:

closed (28 February 2023)

Message from the Guest Editor

Nuclear receptors, including steroid hormone receptors, regulate the transcription of their target genes with the help of coregulators that bind to the receptors in a ligand-dependent manner. Through the regulation of their target genes, nuclear receptors and their coregulators are involved in a broad range of cellular pathways, such as proliferation and differentiation, but also metabolism. In this Special Issue, we are pleased to invite original manuscripts that focus on the role of hormone nuclear receptors and their coregulators in cancer metabolism at the molecular level.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
