

Transglutaminase Diseases, from the Experimental Laboratory to Human Pathology Applications 2.0

Guest Editors:

Prof. Dr. Simone Beninati

Department of Biology, University
of Tor Vergata, Rome, Italy

Prof. Dr. Carlo Mischiati

Department of Neurosciences
and Rehabilitation, Clinical
Biochemistry Laboratory, Faculty
of Medicine, Pharmacy and
Prevention, University of Ferrara,
Via Luigi Borsari 46, Ferrara, Italy

Deadline for manuscript
submissions:

closed (31 August 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is the second volume of our previous Special Issue. Transglutaminases are ubiquitous enzymes which catalyze posttranslational modifications of proteins. Recently, transglutaminase-catalyzed posttranslational modification of proteins has been shown to be involved in the molecular mechanisms responsible for human diseases. Transglutaminase activity has been hypothesized to also be involved in the pathogenetic mechanisms responsible for several human neurodegenerative diseases.

We are pleased to invite you to contribute to the Special Issue, "Transglutaminase Diseases, from the Experimental Laboratory to Human Pathology Applications 2.0", which will be published in the International Journal of Molecular Sciences (IF 4.556). The objective of this Special Issue is to collect and publish both experimental and theoretical contributions from original and high-quality research articles and to encourage researchers to investigate topics in the field of transglutaminases in various diseases.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
