### **Message from the Collection Editors**

Dear Colleagues,

Cardiomyopathies, diseases of the heart muscle, are a leading cause of heart failure and sudden death. At the molecular level, these diseases are complex, involving genetic and environmental factors. Recent advancements in genetics have identified numerous cardiomyopathy-associated genes, providing new insights into disease mechanisms. Translational research is now focusing on the development of precision medicine approaches, including the use of gene therapy and cell-based therapies. This Topical Collection aims to gather cutting-edge research on cardiomyopathies, emphasizing molecular mechanisms, novel therapeutic strategies and the latest technological advancements.

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
