Deadline for manuscript  
submissions:

**closed (30 November 2023)**

### Message from the Guest Editor

Dear Colleagues,

In the age of genome editing, the conservation of the development and function of blood and immune cells between humans and zebrafish has made zebrafish an important animal model for understanding human disease aetiology via the investigation of molecular pathways. Establishment of a relevant, accessible, and cheap animal model for exploring molecular pathways *in vivo* is a crucial step in investigating diseases. This could lead to tailored treatment regimens specific to the needs of the patient, improving their medical outcomes.

Dr Clifford Liongue's research has added significantly to the understanding of cytokine receptor signalling via the JAK/STAT pathway in both blood and immune cells. Dr Liongue utilised genome editing techniques to establish a suite of customised zebrafish lines to aid in the understanding of cytokine receptor signalling-mediated disease aetiology in humans with a focus on leukaemias and lymphomas.

We are inviting novel research about the use of zebrafish models to study new pathways in biology.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
