Message from the Guest Editor

Dear Colleagues,

Lung cancer is a major public health problem worldwide, being the leading cause of cancer death due to the long-term ineffectiveness of current therapies and the typically late stage at time of diagnosis. Specifically, the predominant lung cancer subtype, non-small cell lung cancer (NSCLC), accounts for 85% of lung-cancer-associated deaths. Thus, both novel biomarkers and therapeutic approaches for NSCLC are urgently needed.

Potential topics of relevance to this Special Issue include the following:

- novel biomarkers for lung adenocarcinoma (LUAD),
- novel biomarkers for lung squamous cell carcinoma (LUSC),
- experimental therapeutics in NSCLC,
- animal models of NSCLC,
- in vitro models of NSCLC,
- clinical trials in NSCLC.

Dr. Sergio Piñeiro Hermida

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
