Message from the Guest Editors

Gliomas vary in their pathological characteristics due to their heterogeneous nature. Adult and pediatric gliomas differ dramatically in their pathological origins. Adult-type diffuse gliomas are differentiated on the presence of an isocitrate dehydrogenase 1 (IDH1) mutation, 1p/19q-codeletion, and histological grades. In contrast, aberrations of the mitogen-activated protein kinase pathway in low-grade gliomas, and the presence of histone H3 K27M mutations in diffuse intrinsic pontine and other midline gliomas, are used to differentiate pediatric gliomas. Bioinformatics has provided new insights to potential biomarker targets for gliomas, which may aid in therapeutic interventions. This review will focus on the current pathological characteristics of adult and pediatric gliomas, and touch on some novel therapeutic targets based on recent gene discoveries.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,
60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
