### **Message from the Guest Editors**

Dear Colleagues,

Tumors of the kidney, bladder, and prostate are a major health concern. In recent decades, understanding of their molecular basis has helped to identify new targets and pathways for the molecular mechanism, treatment, and diagnosis of urogenital tumors. This Special Issue aims to provide readers with recent advances in the field. Research articles or reviews are welcome. Topics include but are not limited to the following:

- Molecular mechanisms of urogenital tumors;
- Novel approaches of treatment and diagnosis for urogenital tumors;
- New molecular targets and pathways for urogenital tumors.

Pure clinical studies are out of the scope of this Special Issue; however, clinical submissions with biomolecular experiments are welcome.

Prof. Dr. Francesca Sanguedolce

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
