### Message from the Guest Editor

This Special Issue aims to provide a platform for the latest research clarifying the molecular and immune mechanisms underlying pathological events related to the clinical presentation and different treatment outcomes of RA. Understanding the individual variations in RA pathogenesis at the molecular level will considerably improve patient management and outcomes. Original articles and reviews revealing the inflammatory pathways, the variations in molecular mechanisms in RA pathogenesis and potential new immune-based therapy that targets specific molecular pathways involved in RA inflammation are welcome.

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
