Plenty Road, P.O. Box 71,
Bundoora, VIC 3083, Australia

Deadline for manuscript
submissions:
closed (15 April 2024)

Message from the Guest Editor

During the last decade, there has been a tremendous increase in our awareness of how anthropogenic pollution can alter the behavioural traits of diverse aquatic organisms. The behavioural phenotype is indeed the highest-level integrative neurobiological phenomenon, but at its core lies myriads of intertwined biochemical, cellular, and physiological processes. Therefore, the mechanisms that underlie these changes in behavioural phenotypes can stem among others from the dysregulation of neurotransmitter pathways, electrical signalling, and the cell death of discrete cell populations in the central and peripheral nervous systems.

This Special Issue aims to outline a very broad and inclusive scope of diverse topics in eco-neurotoxicology that include, but are not limited to, behavioural and molecular studies, techniques, methods, as well as new analytical paradigms.

We invite submissions of research papers, short communications, technical notes as well as review and perspective articles that will showcase the latest advances and developments in aquatic eco-neurotoxicology.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
