Hospital, Kaohsiung 80756,
Taiwan

Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editor

The aim of this special issue is to bring together international experts to provide both comprehensive overviews for and original contributions to "Wound Healing", the dynamic research field.

Wound healing after damage to the skin involves a complex interplay between many cellular players of the skin, primarily keratinocytes, fibroblasts, endothelial cells of vessels and recruited immune cells, and their associated extracellular matrix. Wound healing occurs through well-orchestrated phases of hemostasis, inflammation, proliferation, and tissue remodeling.

Keywords: molecular mechanism; signal transduction; microbiota; DNA methylation; histone modifications; micro-RNAs; circRNAs; long noncoding RNA

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
