### Message from the Guest Editors

Dear Colleagues,

Despite the recent advances in cancer treatment, lung cancer still remains the main cause of cancer-related deaths worldwide. Thus, there is a particular need for the development of new therapeutic strategies to improve the survival rates of lung cancer patients.

MicroRNAs are a type of small non-coding RNA that functions as important post-transcriptional regulators of gene expression and are involved in pivotal cellular processes. miRNAs are considered as ideal biomarker candidates due to their exceptional stability in harsh conditions. In addition, miRNAs are used to target several oncogenes or tumor suppressor genes, which contribute to cancer progression. In line with this, several ongoing pre-clinical or clinical trials are evaluating miRNAs as potential biomarkers for response to therapy, as well as therapeutics to treat lung cancer. However, their transfer into clinical practice has been limited by several aspects.

In this special issue, we are interested in recent studies that elucidate the role of miRNAs-based biomarkers and therapeutics as a new tool for lung cancer management.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
