Message from the Guest Editor

Dear Colleagues,

Neuropsychiatric diseases are a group of disorders that affect the brain and its functions, often resulting in alterations of behavior, mood, and cognition. These disorders can have a significant impact on the quality of life of individuals affected by them, and they often have complex and multifactorial etiologies.

Molecular mechanisms of neuropsychiatric diseases refer to the underlying biological and biochemical processes that contribute to the development and progression of these disorders. These mechanisms involve a variety of factors, including genetic, environmental, and epigenetic factors, as well as alterations in cellular signaling pathways and neuronal circuits.

Some of the molecular mechanisms that have been implicated in neuropsychiatric diseases include alterations in neurotransmitter systems, changes in synaptic plasticity, inflammation, oxidative stress, and mitochondrial dysfunction. Understanding these molecular mechanisms is essential for developing new treatments for these disorders and improving the lives of affected individuals and we hope that our special issue significantly contributes to that.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
