This Special Issue, dedicated to the founder of *SISDO*, **Prof. Dr. Luigi Fabrizio Rodella**, aims to honor his *memory*, providing the latest findings concerning the basic mechanisms (genetic, molecular biology, electrophysiology or imaging) and medical treatments of several pain models. Original research articles, reviews and case reports discussing experimental studies, diagnostic purposes, as well as different therapies are welcome. Moreover, papers dealing with various types of pathology that mimic orofacial pain crucial for timely diagnosis, treatment and improved prognosis, will be considered.
