submissions:

20 September 2024

Message from the Guest Editor

Dear Colleagues,

Prostate cancer (PCa) is the second most common cancer in men. The latest statistics have shown that one in six men will be diagnosed with PCa during their lifetime. PCa treatment depends on the tumor's stage, the patient's age and overall health, and tumor risk assessment. For non-metastasized PCa, radical prostatectomy or radiotherapy is the treatment of choice with curative intent. However, due to PCa's high dependency on androgen receptor (AR) signaling, the gold standard for metastasized PCa treatment was dominated by androgen deprivation therapy (ADT) for a long time. However, recent advances have led to a change in the treatment landscape, and combination therapies and new treatment regimens are now approved to treat metastatic PCa. This Special Issue aims to discuss and reflect on all recent advances in basic, translational, and clinical prostate cancer research. Therefore, manuscripts investigating new therapeutic strategies, prognostic as well as diagnostic biomarkers, and resistant mechanisms to the new regimen are of special interest.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
