Message from the Guest Editors

Dear Colleagues,

The generation of complex plant architectures depends on the coordinated balance between the proliferative activity of plant meristems and the differentiation of newly formed cells and tissues into organs with definite sizes, shapes and spatial arrangements. This balance is genetically controlled by molecular regulatory networks involving key transcription factors and phytohormones which, through a complex web of interactions, drive plant developmental patterning. Understanding the molecular mechanisms behind these networks is relevant to fundamental and applied research alike: agronomically relevant traits such as plant biomass, crop yield and agricultural land use all depend on the genetic mechanisms regulating plant architectures.

This Special Issue will focus on the TF–hormone molecular regulatory networks and their role in the genetic control of plant architecture, as well as explore recent advances in the regulation of meristems functions and organ formation. We will welcome original research contributions and timely review articles on model and crop species.

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
