Message from the Guest Editor

Dear Colleagues,

Neuroblastoma (NB) is the most common pediatric extracranial solid tumor, which usually occurs in children under 5 years of age. On the basis of clinical parameters, NB patients are classified as i) low-risk patients, which display localized tumors, with a good response to standard treatment and frequent spontaneous regression, or ii) high-risk patients, which usually display metastatic tumors, with a high frequency of relapse and a survival less than 50%. This Special Issue is focused on molecular determinants that are involved in i) malignant transformation of neuroblasts, ii) metastatic spread and iii) response to chemotherapy in NB patients

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
