Message from the Guest Editor

Dear Colleagues,

Amenorrhea, the absence of menstruation, is one of the most important symptoms in gynecological endocrinology. Primary amenorrhea is a lack of menarche by the age of 16, while secondary amenorrhea means the absence of menses for more than 3 months in women who previously had a regular menstrual cycle.

Pregnancy is the most common cause of secondary amenorrhea. After ruling out pregnancy, the main diagnostic scheme is used to find the cause of this symptom, with polycystic ovary syndrome, functional hypothalamic amenorrhea, hyperprolactinemia, and premature ovarian insufficiency are being the most common causes. Gonadal dysgenesis is the main etiological factor responsible for primary amenorrhea.

Gynecological endocrinology development is strongly associated with advances in the hormonal and genetic backgrounds of different diseases as well as amenorrhea diagnosis and treatment.

The aim of this Special Issue is to present a collection of papers that detail the latest knowledge concerning genetic and hormonal advances (diagnosis and treatment) in amenorrhea.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
