### Message from the Guest Editor

Autoimmune arthritis, such as rheumatoid arthritis and spondyloarthritis, share different genetic, immunologic, and clinical features with Inflammatory Bowel Diseases (IBD). The coexistence of both conditions, known as enteropathic SpA, represents evidence for the gut-joint axis. Several abnormalities in the gut microbiota have been reported both in patients with IBD and autoimmune arthritis, and a deeper understanding of the microbiota composition and function seems to be promising for the identification of diagnostic and predictive biomarkers.

We invite researchers to submit original molecular research and review articles in the pathogenesis of autoimmune arthritis and inflammatory bowel diseases.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
