Message from the Guest Editor

Dear Colleagues,

Inflammatory cytokines are involved in the development and progression of various autoimmune-mediated arthritis such as rheumatoid arthritis, and psoriatic arthritis. The pathophysiological significance of inflammatory cytokines and their related pathways has been found to be reliable in inflammatory arthritis through many previous studies, leading to the development of successful cytokines-targeting strategies, such as TNF α or IL-17.

This Special Issue aims to stimulate comprehensive research that confirms the previously unknown roles of inflammatory cytokines in autoimmune arthritis through preclinical animal models and/or patients-derived samples, suggesting their potential as a diagnostic or therapeutic strategy. The Special Issue wants to focus on both basic science and translational research in inflammatory arthritis.

Dr. Su-jin Moon

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
