Message from the Guest Editor

Dear Colleagues,

It is a well-appreciated view that autophagy has pleiotropic roles in cellular and organismal regulation. This extends beyond its canonical roles in nutrient recycling and protein degradation. For this reason, autophagy has been of intense interest as a target for cancer therapy. However, dissecting the contribution of autophagy in tumour microenvironment has only recently been examined with immunocompetent models. These studies reveal that autophagy contributes to many aspects of immune regulation from innate pathogen sensing to adaptive immune responses. This Special Issue focuses on autophagy and its interplay in the tumour and immune system that stem from lessons learnt in murine models and more recently clinical trials using autophagy manipulators for cancer treatment.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
