

Novel Biomarkers in Cardiovascular Disease: From Bench to Bedside

Guest Editors:

Prof. Dr. Christian Jung

Medical Faculty, Division of
Cardiology, Pulmonology and
Vascular Medicine, University
Hospital Düsseldorf, Heinrich-
Heine-University Düsseldorf,
40225 Düsseldorf, Germany

Dr. Michael Lichtenauer

Department of Internal Medicine
II, University Clinic Salzburg,
Paracelsus Medical University
Salzburg, Müllner Hauptstraße
48, 5020 Salzburg, Austria

Deadline for manuscript
submissions:

closed (30 April 2021)

Message from the Guest Editors

Biomarkers such as troponins (myocardial ischemia) and NT-proBNP (myocardial wall stress), interleukin-6 or procalcitonin in inflammatory diseases have shown great potential, though, they just cover aspects of the pathophysiological process. Research on novel biomarkers is important for a better understanding of multiple cellular pathways that are involved in these disease conditions. For example, when heart disease is accompanied by other pathophysiological entities such as arrhythmia, renal failure, diabetes, pulmonary hypertension, or COPD, risk assessment could become even more complicated. Further research on biomarkers could help identify those patients at higher risk, plan individualized treatments, and improve secondary prevention strategies.

This Special Issue is dedicated to all original research articles and reviews, exploring novel biomarkers in cardiovascular diseases, focus on therapeutic targets, pathological effects and signaling pathways. Purely clinical investigations are not suitable but clinical submissions with at least some component of molecular studies are quite welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
