Message from the Guest Editor

It is our pleasure to announce a new Special Issue of the *International Journal of Molecular Sciences* on “**Molecular Biomarkers in Neurodevelopmental and Neurodegenerative Disorders**”. With this Special Issue, we intend to collect both original contributions and review articles focused on the:

1. Research directed at the development of molecular biomarkers for the early diagnosis and detection of the progression of neurodevelopmental or neurodegenerative disorders;
2. The investigation of the underlying molecular mechanisms, with the aim of identifying molecular signatures, leading to targeted therapeutics;
3. Research leading to new therapeutic approaches that could help in biomarker discovery and that are currently in clinical testing.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
