submissions:
closed (25 December 2018)

Message from the Guest Editor

Dear Colleague,

Biomaterials is an important subject with a variety of applications in sensors. The biomaterial in focus is inorganic–organic hybrid materials applied to sensors. This Special Issue is looking for research articles and reviews focusing on a combination of experimental and computational simulation procedures, as a combination applied for new material designs or validation. This invitation is extended to application in material informatics to screen molecules of interest to design a property-specific new biomaterial.

Keywords

- biomaterial
- protein sensor
- MRAM
- informatics
- sensor
- computational modelling

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
