Message from the Guest Editors

Dear Colleagues,

Blood–brain barrier (BBB) regulates brain fluid environment strictly within a narrow limit. Passage of substances, drugs, proteins, large molecules are severely restricted. However, brain diseases following trauma, ischemia, strenuous stress, psychiatric illnesses and/or psychostimulants overuse, etc., and many neurological diseases are associated with breakdown of the BBB to large molecules. BBB breakdown allows passage of serum proteins and other toxins into the fluid microenvironment of the central nervous system (CNS) resulting in cerebral edema formation and subsequent cellular injuries. This Special Issue present developments in BBB research to improve therapeutic measures as well as nanomedicine use in several CNS diseases.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
