Deadline for manuscript
submissions:

closed (30 April 2019)

Message from the Guest Editor

Tremendous progress has been made during last few decades to understand the complex process of symbiotic nitrogen fixation that eventually could lead to the extension of BNF to non-leguminous crops. This Special Issue will cover a wide range of topics in the area of symbiotic nitrogen fixation. We invite investigators to submit original research articles that explore different topics on symbiotic nitrogen fixation including, but not limited to:

- Regulation and genetics of nitrogen fixation
- Carbon and nitrogen metabolism
- Host-specificity in nodulation
- *R* genes in the control of nodulation specificity
- Rhizobial T3/T4 secretion systems and role of symbiotic effectors
- Nodule-specific symbiotic peptides
- Extension of nitrogen fixation to other crops

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
