

Recent Advances in Brain Vascular Diseases Management and Therapy

Guest Editor:

Prof. Dr. Aurel Popa-Wagner

1. Chair of Vascular Neurology and Dementia, Essen University Medical School, Essen, Germany
2. Experimental Research Center for Normal and Pathological Aging Director, University of Medicine and Pharmacy of Craiova, Craiova, Romania

Deadline for manuscript submissions:
closed (31 March 2019)

Message from the Guest Editor

Dear Colleagues,

This Special Issue of *IJMS* will provide an up-to-date information on molecular, cellular and pathophysiological events associated with different aspects of brain aging, from latest developments in the field of neurodegenerative disorders to cerebral microvascular mechanisms of cognitive decline. New avenues for research targeting cellular senescence, epigenetics, and endocrine mechanisms of brain aging are also discussed. Based on the current literature it is clear that understanding brain aging and reducing risk for neurological disease with age requires searching for mechanisms and treatment options beyond the age-related changes in neuronal function. We also cover brain vasculature recent advances in signaling pathways that can potentially protect cells as well as treatment options for the maintenance of cerebrovascular to prevent diseases associated with brain vasculature remodelling in response to aging and associated diseases and open new avenues for treatment options.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
