Deadline for manuscript
submissions:

closed (15 April 2023)

Message from the Guest Editors

Colorectal cancer (CRC) is one of the most common malignant tumors. Despite the improved prevention and detection of this disease, its prognosis has currently not changed, and more than 50% of patients will develop liver metastases during their disease, which represent the main cause of morbidity and mortality. Local recurrence (LR) at the first site of disease is much less common, constituting 10 to 20% of all relapses. Another important issue in CRC is the intrinsic or acquired resistance to treatments. Great effort has been made to identify patients with unfavourable prognosis that may benefit from adjuvant therapy. However, to date, therapy in CRC is used only if there are metastases. The choice of target agents for colorectal cancer therapy is limited, and their efficiency is not always compelling. Even in patients with similar clinical or pathologic features, their survival outcomes vary. Therefore, the discovery of new molecular markers to improve the prognosis and prediction of the adjuvant treatment regimens that enable personalized cancer therapies are urgently needed.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology,
Institute of Nutrition and Food
Technology “Jose Mataix”,
Biomedical Research Center,
University of Granada, Avda.

Granada, Spain

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
