Avenue, Dallas, TX, USA

Prof. Dr. Stephen F. Amato

Global Regulatory Affairs/Quality
Assurance/Advanced
Manufacturing Systems, College
of Professional Studies,
Northeastern University, Boston,
MA, USA

Deadline for manuscript
submissions:

closed (31 May 2019)

Message from the Guest Editors

The discovery and development processes, inclusive of regulatory affairs, manufacturing, and post-market operations, are cornerstones in the commercialization of innovative pharmaceutical and biotechnology products to address unmet clinical needs. Effective drug discovery processes provide a continuous pipeline of candidates for drug development, which in turn generates approvable compounds. Novel approaches across the fields of drug discovery, drug development, and regulatory affairs are of paramount interest to multiple healthcare industry stakeholders, including patients, biopharmaceutical manufacturers, clinicians, provider institutions, and payers.

This Special Issue, “Drug Discovery, Drug Development and Regulatory Affairs”, will focus on novel approaches (original research articles) as well as reviews of current practices surrounding the continuum of taking products from the beaker to the bedside. It will present innovative research involving aspects of drug discovery, drug development, regulatory science, commercialization, and market access for both small-molecule pharmaceuticals, as well as biotechnology products.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
