Deadline for manuscript submissions:
closed (31 January 2023)

Message from the Guest Editor

Dear Colleagues,

Epstein–Barr virus (EBV) and Kaposi’s sarcoma-associated herpesvirus (KSHV) are gamma-herpesviruses belonging to the *Herpesviridae* family. They are enveloped viruses with double-stranded DNA (150 kbp) contained within an icosahedral capsid surrounded by an envelope with several glycoproteins (GPs) necessary for the infection of host cells. EBV infects 95% of the population worldwide and is usually asymptomatic. However, several circumstances induce a microenvironment that is related to the onset of some diseases. KSHV was detected in Kaposi’s sarcoma patients in the 1990s, and it infects endothelial cells, monocytes, dendritic cells (DCs), and T lymphocytes. This virus expresses proteins that mimic cellular molecules regulating proliferation, apoptosis, and autophagy. With this Special Issue, we wish to present investigations of both conventional and novel treatments of EBV- and KSHV-associated diseases, considering all adverse effects and with the aim of improving therapy outcomes. This Special Issue welcomes the submission of both original research articles and comprehensive review papers (4000+ words) on this topic.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
