Message from the Guest Editor

Dear Colleagues,

Endocrine disrupting chemicals are generally defined as substances in our environment, food and consumer products that can disrupt hormonal balance in humans and wildlife and result in adverse health effects, or in their offspring.

In this Special Issue we will address the state-of-the-art knowledge of the mechanisms and consequences of endocrine disrupting chemicals for the health of humans and wildlife, and their offspring. Hormonal systems are often considered the targets of endocrine disrupting chemicals, but every organ in the body is a receptor of these hormonal signals to perform appropriately. It is here where things can go wrong.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
