Deadline for manuscript submissions:

**closed (30 September 2021)**

### Message from the Guest Editors

Dear Colleagues,

Environmental pollutants including chemical and physical agents, dietary components, endocrine disruptors, nutraceuticals and nanomaterials for drug delivery, can have long-lasting adverse effects on human health, by affecting reproduction, development and metabolism, even in subsequent generations. Although the underlying mechanisms remain largely unknown, new insights are emerging, which suggest that chronic exposure to environmental pollutants can affect cell metabolism and induce genetic damage and biological adverse effects at both peripheral and central levels, playing a key role in inducing epigenetic changes that could have a trans-generational inheritance in the offspring. From this hand, it is emerging that environmental pollutants could be toxic and associated with an increased risk of neurological disorders, reduced fertility and cancer. Therefore, this Special Issue welcomes reviews and research papers which aim to provide an up-to-date report on the adverse effects of environmental pollutants on human health, with particular attention on new pollutants and their emerging epigenetic effects, and molecular interactions in experimental model systems.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
