

## Role of G-Protein Coupled Receptors in Cardiovascular Diseases

Guest Editors:

**Dr. Emiel P.C. van der Vorst**

Aachen-Maastricht Institute for CardioRenal Disease (AMICARE), Interdisciplinary Center for Clinical Research (IZKF), Institute for Molecular Cardiovascular Research (IMCAR), University Hospital Aachen, RWTH Aachen University, Aachen, Germany

**Ms. Selin Gencer**

Institute for Cardiovascular Prevention (IPEK), Ludwig-Maximilians-Universität (LMU) München, Munich, Germany

Deadline for manuscript submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

Cardiovascular diseases (CVDs) are a group of disorders of the heart and blood vessels, including coronary heart disease, cerebrovascular disease and thrombosis. Although over the years, significant efforts have been made to prevent or treat these diseases, it still remains one of the leading causes of death worldwide. The inflammatory processes in CVDs are facilitated by a network of circulating immune cells and tissue resident cells, which is orchestrated by various mediators which interact, bind and induce signaling. Over the last years, G protein coupled receptors (GPCRs) emerged as important players in recognizing these mediators, both in steady state and inflammatory processes like CVDs. GPCRs are seven-transmembrane domain receptors and can be subdivided in several sub-classes and subgroups. In order to better comprehend the pathology behind CVDs, it is important to obtain a good overview of the role of GPCRs and the underlying molecular mechanisms. Therefore, the present Special Issue aims to provide an current state-of-the-art overview of the role of GPCRs in CVDs.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. José L. Quiles

Department of Physiology,  
Institute of Nutrition and Food  
Technology “Jose Mataix”,  
Biomedical Research Center,  
University of Granada, Avda.  
Conocimiento s/n, 18100 Armilla,

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
