Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Hematological malignancies represent an intricate addition to the oncological landscape, especially in light of the new classifications that have been characterized in recent years. Nowadays, it is important to fully dive into the mechanisms driving hematological malignancies, such as genetic mutations and the subsequent dysregulation of various signal pathways, providing a feasible means of gaining insight into the risks of disease progression. The role of the latest diagnostic tools and techniques is essential to improve the detection and classification of hematological malignancies, offering hope for early intervention and personalized treatment strategies. Additionally, it is crucial to explore the landscape of novel therapeutic approaches, including targeted therapies (such as tyrosine-kinase inhibitors), immunotherapies, and gene editing techniques, highlighting promising perspectives for patient outcomes.

This Special Issue aims to uncover the emerging trends and reviews shaping the future of hematological malignancy treatment, from precision medicine to innovative combination therapies.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
