Deadline for manuscript  
submissions:

**closed (28 February 2023)**

### Message from the Guest Editors

Recent achievements in the field of genomic and transcriptomic analyses have uncovered the molecular and genetic mechanisms underlying many genetic diseases. Many observations suggest the role of kinase inhibitors in the treatment of several human genetic diseases. The use of these kinase inhibitors is, in most cases, still experimental, nevertheless, clinical studies with already available inhibitors, as well as preclinical studies in animal models with novel molecules, may add important tools to the treatment of these rare and devastating diseases.

We plan to collect contributions that can shed light on important aspects related to the development of kinase inhibitors and to the application of these compounds in selected inherited human diseases.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
